ADDITIONAL INFORMATION SUPPORTING njd (e.g., paragraph 1 site conditions; paragraphs 2-3 rationale used to determine NJD, including information reviewed to assess potential navigation or interstate commerce connections; and paragraph 4 site information on waters of the U.S. occurring onsite): **The wetland basins to be impacted by this project are entirely located in Nicollet County, Minnesota. There are no surface water connections to a water of the US. It seems that the natural flow direction of any these basins would be to flow SW. The existing quarry does not allow any connection to the nearby Minnesota River in that direction. There is no apparent use for which these wetlands could be used for interstate/foreign travelers, related commerce or industry. No fish or shellfish for commercial sale are known to reside in this wetland.**
